# SAFETY DATA SHEET Carbon and Alloy Steel Tubing

#### 1. Identification

Product identifier Carbon or Alloy, seamless tube and pipe

Other means of identification Not available.

Synonyms Steel

Recommended use SBQIMBQ applications.

Recommended restrictions

None known.

Manufacturer Contact Information

Address Michigan Seamless Tube and Pipe, LLC

400 McMunn Street South Lyon MI 48178 (248) 486-0100 Safety Cordinator

Telephone number (248) 486-0100

Contact person Safety Cordinator

Emergency telephone (248) 486-0100

E-mail TCarrill@mstube.com

## 2. Hazard(s) identification

Physical hazards

Health hazards

OSHA defined hazards

Not classified.

Not classified.

Not classified.

Hazard symbol None Signal word None Hazard statement None

Precautionary statement

Prevention Avoid creating dust.

Response Wash skin with soap and water.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance

with local authority requirements.

Hazard(s) not otherwise classified (HNOC)

None

Supplemental information Hazard statement In its manufactured and shipped state, this

product is considered non-hazardous. Processing may generate hazardous fumes and dusts. Welding,

cutting and metalizing can generate ozone. Ozone can cause irritation of eyes, nose and

respiratory tract.

## 3. Composition/information on ingredients

Chemical name	CAS number	Percent (%)
Iron	7439-89-6	75-99
Chromium	7440-47-3	<14
Manganese	7439-96-5	<5
Nickel	7440-02-0	<4
Silicon	7440-21-3	<2.5
Copper	7440-50-8	<1.5
Carbon black	1333-86-4	<1.2
Antimony	7440-36-0	<0.5
Arsenic	7440-38-2	<0.5

Cobalt	7440-48-4	< 0.5
Lead	7439-92-1	< 0.5
Molybdenum	7439-98-7	<1.5
Tungsten	7440-33-7	<1.7

The product is an alloy. Other alloys and trace elements may be present, depending on the product, in quantities generally less than 0.5%. These elements may include Boron, Calcium, Niobium, Nitrogen, Phosphorus, Titanium, Vanadium, Sulfur, Aluminum (<1.2%), Tin, Zinc, Bismuth, Beryllium, Selenium.

Composition comments: All concentrations are in percent by weight

1	S١	ret.	-aic	l m	02	CII	res
4.	П	121	all			Su	162

In case of inhalation of fumes from heated

product: Move into fresh air and keep at rest. Get medical attention if symptoms persist. If breathing is difficult, give oxygen. If breathing

stops, provide artificial respiration.

Skin contact Wash skin with soap and water. In case of

burns with hot metal, rinse with plenty of cold

water. If burns are severe, consult a

physician. If skin irritation or an allergic skin reaction develops, get medical attention.

Eye contact Any material that contacts the eye should be

washed out immediately with water. If easy to do, remove contact lenses. Get medical attention promptly if symptoms persist or

occur after washing.

Ingestion Solid steel: Not applicable. Dust: Get medical

attention if any discomfort continues.

Most important

symptoms/effects, acute and delayed

Exposed individuals may experience eye tearing, redness, and discomfort. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Typical symptoms last 12 to 48 hours and are characterized by metallic taste in the mouth, dryness, and irritation of the throat, followed by weakness, muscle

pain, fever, and chills.

## 5. Fire-fighting measures

Suitable extinguishing media No unusual fire or explosion hazards noted.

Use fire-extinguishing media appropriate for

surrounding materials.

Unsuitable extinguishing media None Known

Specific hazards arising from the chemical	At temperatures above the melting point, may liberate fumes of iron, nickel, and zinc oxide.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire-fighting equipment/instructions	Use standard firefighting procedures and consider the hazards of other involved materials.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Cold solid metal: No special precautions are necessary beyond normal good hygiene practices.

See Section 8 of the SDS for additional personal protection advice when handling this product. Hot metal: Avoid contact with hot material. Wear protective clothing as described in Section 8 of this safety data sheet.

Methods and materials for containment and cleaning up

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

Collect for recycling. Environmental precautions No specific precautions.

## 7. Handling and storage

Precautions for safe handling

Avoid contact with sharp edges and hot surfaces. Use appropriate gloves and tools to ensure safe handling. Use work methods which minimize dust/fume production. Do not breathe fumes and dusts. Follow the recommendations in ANSI Z49.1, Safety in welding and cutting (ANSI=American National

Standard Institute).

Conditions for safe storage, including any incompatibilities

Store in a dry place. Store away from: Acids.

## 8. Exposure controls/personal protection

Occupational exposure limits US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Chemical name	CAS number	OSHA PEL/ ACGIH TLV
Iron	7439-89-6	_
Chromium	7440-47-3	1.0/0.5
Manganese	7439-96-5	5.0/0.1
	Page 3 of 9	

Nickel	7440-02-0	1.0/1.5
Silicon	7440-21-3	5.0/10.0
Copper	7440-50-8	1.0/1.0
Carbon black	1333-86-4	3.5/3.0
Antimony	7440-36-0	0.5/0.5
Arsenic	7440-38-2	0.01/0.01
Cobalt	7440-48-4	0.01/0.02
Lead	7439-92-1	0.05/0.05

Appropriate engineering controls

Adequate ventilation should be provided so that exposure limits are not exceeded. Use local exhaust when welding, burning, sawing, brazing, grinding or machining to prevent excessive dust or fume exposure.

Individual protection measures

Eye/face protection

Risk of contact: Wear approved safety goggles. Use of safety glasses or goggles is required for welding, burning, sawing, brazing, grinding or

machining operations.

Hand protection Wear protective gloves. Risk of contact:

Wear suitable protective clothing.

Respiratory protection Use a NIOSH/MSHA approved respirator if

there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

Thermal hazards When material is heated, wear gloves to

protect against thermal burns. Thermally protective apron and long sleeves are recommended when volume of hot material is

significant.

General hygiene considerations Always observe good personal hygiene

> measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove

contaminants. Observe any medical

surveillance requirements.

# 9. Physical and chemical properties

**Appearance** Massive, solid metal.

Physical state Solid. Form Solid.

Color Metallic gray.

Odor None.

Odor threshold Not applicable. pH Not applicable.

## 10. Stability and reactivity

Reactivity Stable at normal conditions.

Chemical stability This product is stable under expected

conditions of use.

Possibility of hazardous reactions Will not occur.

Conditions to avoid Contact with incompatible materials. Contact

with acids will release flammable hydrogen

gas.

Incompatible materials Strong acids. Oxidizing agents.

Hazardous decomposition products

At temperatures above the melting point, may

liberate fumes containing oxides of Iron and

alloying elements.

# 11. Toxicological information

Information on likely routes of exposure

Ingestion Solid steel: Not relevant, due to the form of

the product. However, ingestion of dusts generated during working operations may

cause nausea and vomiting.

Inhalation No inhalation hazard under normal

conditions. Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal

oxides.

Skin contact Under normal conditions of intended use, this

material does not pose a risk to health. Dust may irritate skin. Contact with hot material can cause thermal burns which may result in

permanent damage.

Eye contact

Under normal conditions of intended use, this material does not pose a risk to health. Contact with hot material can cause thermal burns which may result in permanent damage. Grinding and sanding this product may generate dust. Dust may irritate the eyes.

Symptoms related to the physical, chemical and toxicological characteristics

Exposed individuals may experience eye tearing, redness, and discomfort. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Typical symptoms last 12 to 48 hours and are characterized by metallic taste in the mouth, dryness, and irritation of the throat, followed by weakness, muscle pain, fever, and chills.

#### Information on toxicological effects

Acute toxicity Components

Processing may generate hazardous fumes and dusts. Welding, cutting and metalizing can generate ozone. Ozone can cause irritation of eyes, nose and respiratory tract.

Skin corrosion/irritation Dust may irritate skin.

Serious eye damage/eye irritation Dust may irritate the eyes.

Respiratory sensitization Not relevant, due to the form of the product.

Contains nickel: May cause allergy or asthma symptoms or breathing difficulties if inhaled. This ingredient is bound within the product and release is not expected under normal

condition.

Skin sensitization Contains nickel: May cause an allergic skin

reaction.

Germ cell mutagenicity

Not relevant, due to the form of the product.

Carcinogenicity

Not relevant, due to the form of the product.

Inhalation of carbon black dust may cause cancer, however due to the physical form of the product inhalation of dust is not relevant. Nickel and Nickel Compounds, Lead and Lead Compound, and certain Chromium Compounds (e.g., hexavalent chromium) are considered known or possible carcinogens. This ingredient is bound within the product and release is not expected under normal

condition.

IARC Monographs. Overall Evaluation of Carcinogenicity

Carbon black (CAS 1333-86-4) Chromium (CAS 7440-47-3) Cobalt (CAS 7440-48-4) Lead (CAS 7439-92-1) Nickel (CAS 7440-02-0) 2B Possibly carcinogenic to humans.

3 Not classifiable as to carcinogenicity to humans.

2B Possibly carcinogenic to humans. 2B Possibly carcinogenic to humans. 2B Possibly carcinogenic to humans.

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Arsenic (CAS 7440-38-2)

Cancer

Reproductive toxicity

Not relevant, due to the form of the product.

Specific target organ toxicity - single exposure

No data available.

Specific target organ toxicity - repeated exposure

Not relevant, due to the form of the product. Contains Maganese: Causes damage to organs (lung) through prolonged or repeated exposure by inhalation. This ingredient is bound within the product and release is not expected under normal condition.

Aspiration hazard

Due to the physical form of the product it is

not an aspiration hazard.

Chronic effects

Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign pneumoconiosis (siderosis). Repeated overexposure to lead, arsenic, and nickel can increase the risk of developing cancer. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases. Exposure to manganese fume/dust can affect the central nervous system (apathy, drowsiness, weakness and other chronic symptoms such as postural tremors). The ingredients of the alloy are bound within the product and release is not expected under normal conditions.

# 12. Ecological information

Ecotoxicity The environmental hazard of the product is

considered to be limited.

Persistence and degradability

No data available.

Bioaccumulative potential No data available on bioaccumulation.

Mobility in soil Not relevant, due to the form of the product.

Other adverse effects None known.

## 13. Disposal considerations

Disposal instructions Dispose waste and residues in accordance

with applicable federal, state, and local

regulations.

Hazardous waste code Not regulated.

Waste from residues / unused products Disposal recommendations are based on

> material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal. Recover and recycle, if

practical.

Contaminated packaging Emptied containers may retain product

residue, follow label warnings

### 14. Transport information

DOT Not regulated as a hazardous material by DOT.

IATA Not regulated as a dangerous good. **IMDG** Not regulated as a dangerous good.

### 15. Regulatory information

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA) Hazard categories

Immediate Hazard - No Delayed Hazard - Yes Reactivity Hazard - No Pressure Hazard - No Fire Hazard - No

SARA 302 Extremely hazardous substance NO

SARA 311/312 Hazardous chemical Only if fume or dust emitted or released from

a manufactured solid that is being modified

SARA 313 (TRI reporting) YES - for toxic components

Toxic Substances Control Act (TSCA) Inventory YES - for toxic components

# 16. Other information, including date of preparation or last revision

<sup>\*</sup>A "Yes" indicates this product complies with the inventory requirements administered by the governing country(s).

A "No" indicates that one or more components of the product are not listed or exempt from listing on the inventory administered by the governing country(s).
