

MECHANICAL TUBE

**OUR MECHANICAL TUBING IS AVAILABLE
IN A WIDE VARIETY OF SHAPES**

SPECIALIZING IN CUSTOM SIZES AND SHAPES

Cold-drawn mechanical tubing possesses exceptional strength-to-weight ratios, excellent surface quality and dimensional accuracy, and is available in carbon and alloy grades to meet your varying mechanical properties. Every order we produce is custom made based on your specifications and requirements. Some of our most popular grades are the 10XX and 15XX carbon as well as 41XX, 43XX and 86XX alloy. Our expert team can also develop custom chemistries to fit your specific application.

Including round, square and hexagon, and can be ordered as:

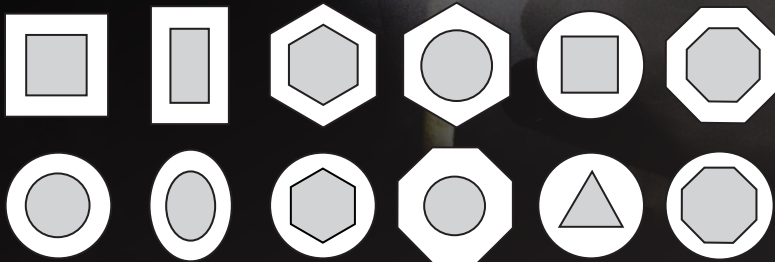

Outside Diameter x Wall thickness
Inside Diameter x Wall thickness
Outside Diameter x Inside Diameter
Nominal Wall
Minimum Wall
Special tolerances are available

MST produces mechanical tubes for many industries, including:

Automotive, Transportation and Heavy Truck
Aerospace and Aircraft
Heavy Equipment and Agriculture
OCTG
Mining and Construction

Common steel grades of mechanical tube include:

Carbon grades: 10xx, 11xx, 15xx
Alloy Grades: 41xx, 43xx, 48xx, 50xx,
51xx, 61xx, 63xx, 86xx, 93xx

we offer

- Quick turnaround
- Expedited deliveries
- Custom lengths
- 100% melted and manufactured in the USA
