

# QUENCH & TEMPER HEAT TREAT LINE

## EFFICIENT IN-HOUSE QUENCH & TEMPER LINE

MST continues to make capital improvements to better serve customers and improve on our stellar delivery performance. Our new custom-designed Quench & Temper heat treat line significantly improves our state-of-the-art manufacturing facility and results in considerable efficiencies and faster turnaround times.

By bringing the Quench & Temper process in-house, MST is better able to:

- control mechanical properties of the finished material
- oversee the process from order entry to truckload delivery
- reduce lead times and turnaround times
- manage quick changeovers from order to order
- react to emergency repair situations more quickly
- improve upon our already stellar delivery performance
- large mill quantities with small mill flexibility

Our heat treat line is specifically designed to cover MST's full line of products.

Please inquire about our available sizes and lengths.

## STEEL GRADES

4130, 4140, 4340, 5140, 8620  
9% chrome and 13% chrome

We also can achieve:

- Mechanical properties that meet L80, P110, industry standards
- Customized mechanical properties
- Improved OD and ID tolerances

## we offer

- Quick turnaround
- Expedited deliveries
- Custom lengths
- 100% melted and manufactured in the USA
