## **Michigan Seamless Tube PFAS Statement-November 8, 2024**

Dear Valued Customer,

We understand that you, as well as the general public, are concerned about the presence of PFAS in products used in production, in products sold to the public, and in the water supply.

We have surveyed our steel suppliers and have reviewed the substances we use in our production processes and can confirm that neither we nor our steel suppliers use any PFAS in the products supplied to you.

Please contact your local MST representative if you have any questions or need further information.

Thank you for your continued support

**Michigan Seamless Tube LLC**
