Proposition 65 Statement

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that may cause [cancer](#), birth defects or other [reproductive harm](#). These chemicals are found in the products that Californians purchase, use in their homes or workplaces, or that are released into the environment.

The raw materials that Michigan Seamless Tube uses to manufacture its products all contain nickel, antimony, arsenic, beryllium, chromium, cobalt, and cadmium, which are on the Proposition 65 chemical list. Michigan Seamless Tube does not add any of these substances to its products through its manufacturing processes and the mere presence of a chemical in a product, however, does not require any Proposition 65 warning.

For further information regarding our products, please refer to the Material Safety data Sheet for the applicable product.
